

2012 RTIP Candidate Project

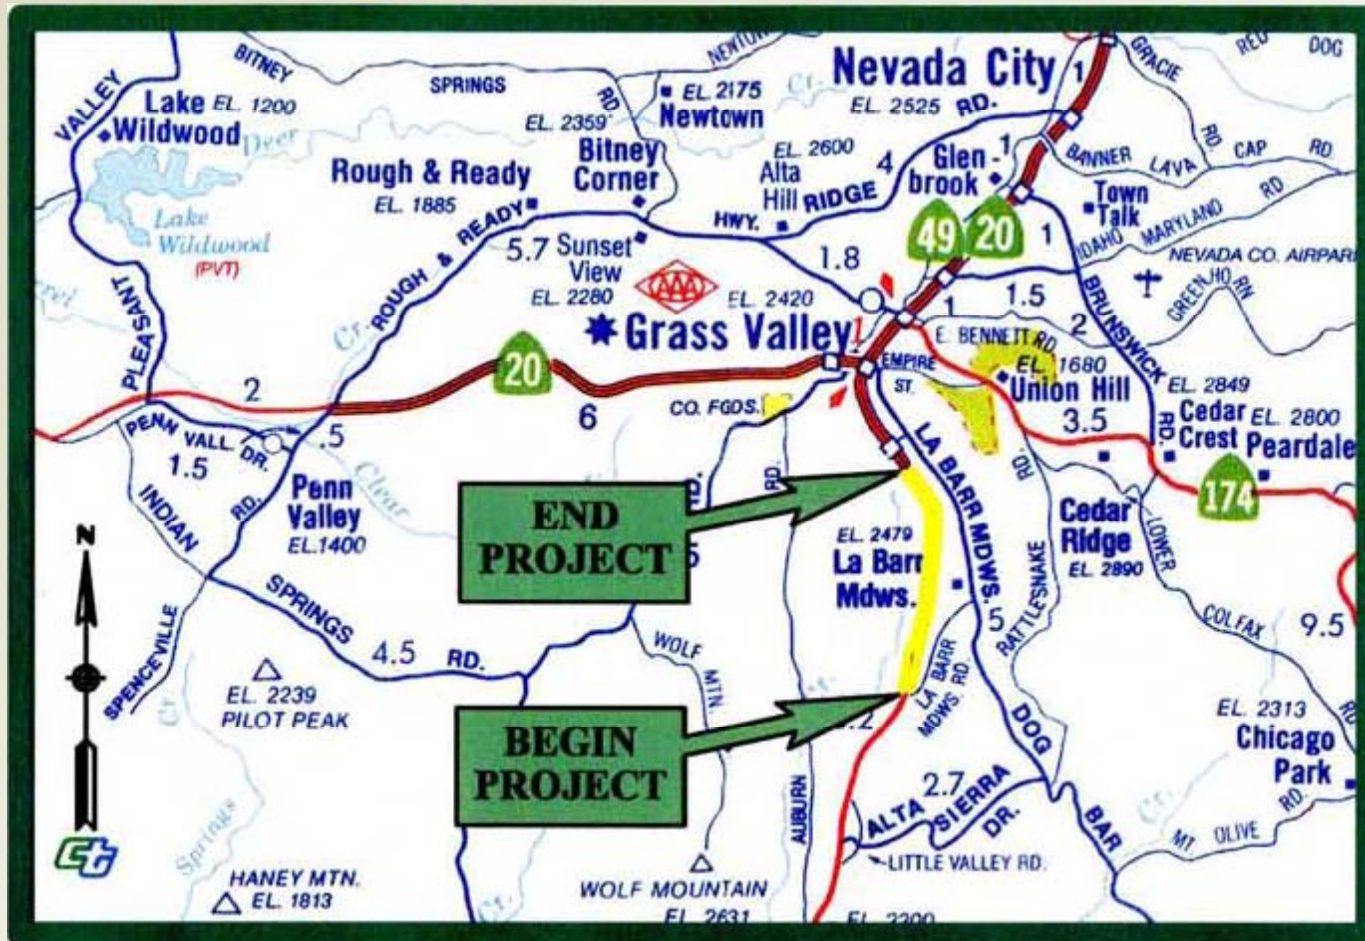

State Route 49

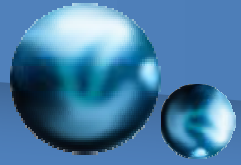

Project Limits

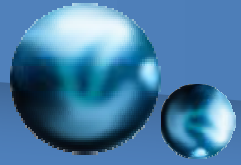

State Route (SR) 49 Near La Barr Meadows Road to approximately four tenths of a mile South of McKnight Way

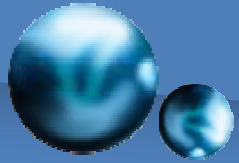

Project Description

- Widen SR 49 to a four-lane conventional, access control highway with a continuous median/left-turn lane and provide 8-foot shoulders to improve traffic operations and safety
- Originally estimated at \$77 Million, the total project cost is now estimated at \$32 Million

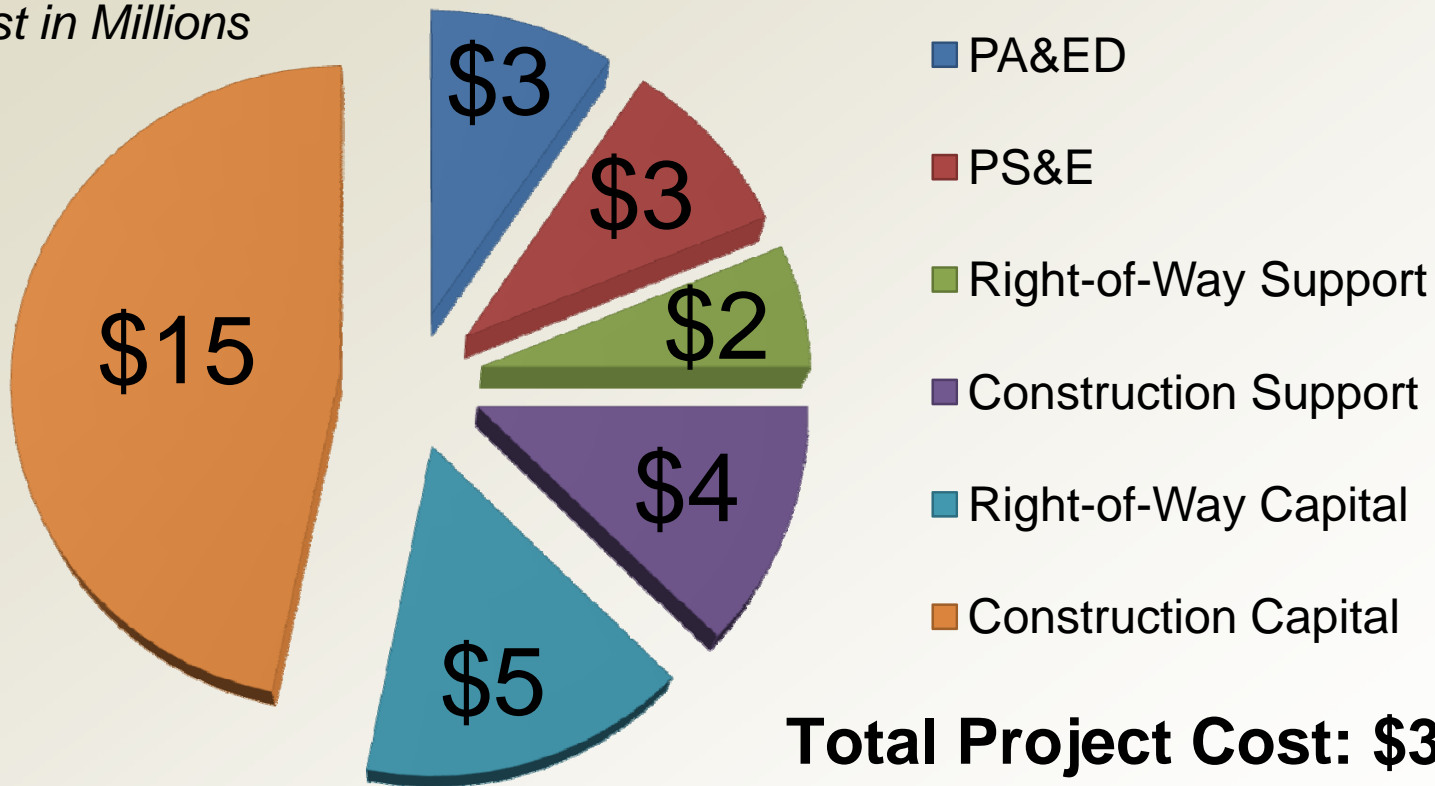

Preferred Alternative

- Widen existing highway by adding one 12-foot wide lane in each direction of travel with a continuous 14-foot median/left-turn lane
- Construct 8-foot paved shoulders and right turn pockets
- Construct two signalized at-grade intersections and an overcrossing structure
- Improve vertical alignments and shift center line in order to minimize impacts to residential properties and improve sight distance

TBD

To be included in 2012 RTIP

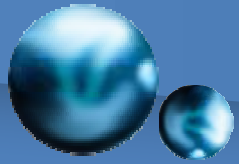

Future Project Phases

- SR 49 is an Interregional Route and is classified as a High Emphasis Focus Route
- District 3 fully supports the use of ITIP funding for future phases of this project, subject to funding availability

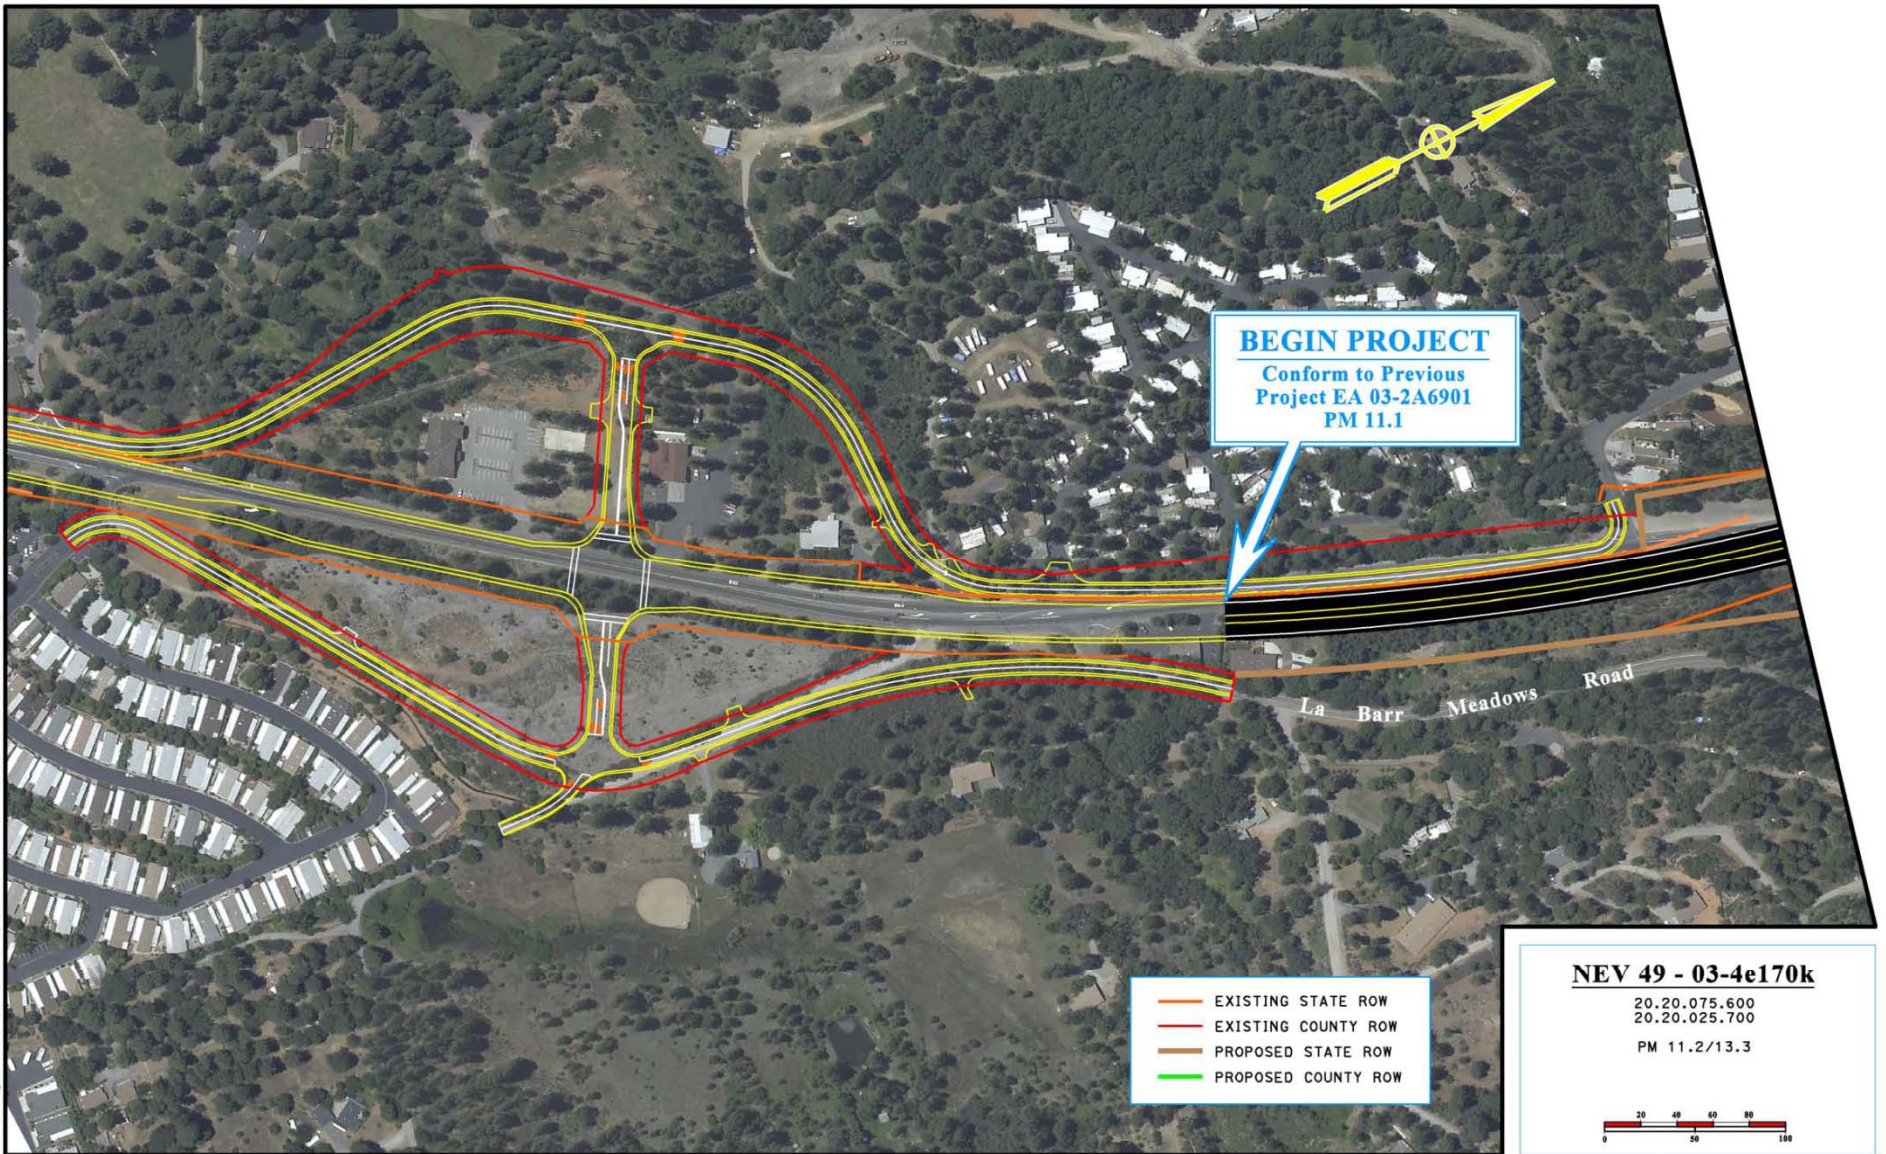

Consistency With Existing Plans

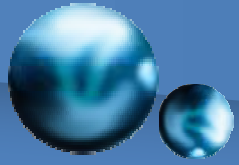

- The proposed project is consistent with the existing Corridor System Management Plan (CSMP), the 2010 Regional Transportation Plan (RTP), and the 1998 Interregional Transportation Strategic Plan (ITSP)
- This project is cited as Priority #3 and Priority #4 in the CSMP (Table 12, pg 39)
