The purpose of the RTP is to document the short-term (2010-2020) and long-term (2020-2030) regional transportation policy direction, multi-modal regional transportation needs, and to set forth a financially constrained action plan to meet those needs. To qualify for federal and state funding, projects must be included in or be consistent with the plan. The *Draft 2010 Nevada County RTP* includes the projects that can reasonably be anticipated to be funded within the

plan's fiscal constraints. The RTP also identifies projects that can be implemented if additional funds become available.

The RTP is comprised of the following main elements:

- ◆ The *Policy Element* identifies transportation goals, objectives, performance measures, and policies to meet the needs of the multi-modal transportation needs of the region, and is the basis for the development of the *Action Element*.
- ◆ The *Action Element* provides a discussion of each component of the regional transportation system and transportation related issues, and includes a short-term and long-term action plan.
- ◆ The *Financial Element* details the financial assumptions and revenue forecasts and presents a financially constrained funding scenario in correlation with the *Action Element* of the RTP.
