

# Regional Transportation Mitigation Fee (RTMF) Update & Nexus Study

→ Don Hubbard, TE, AICP Rosanna Southern, EIT

## **Topics Covered**

- Regional Transportation Mitigation Fee Program Background
- AB-602 and SB-13 Requirements
- Nexus Study
- Draft Results and Proposed Change in Fees
- Questions & Answers

# Background

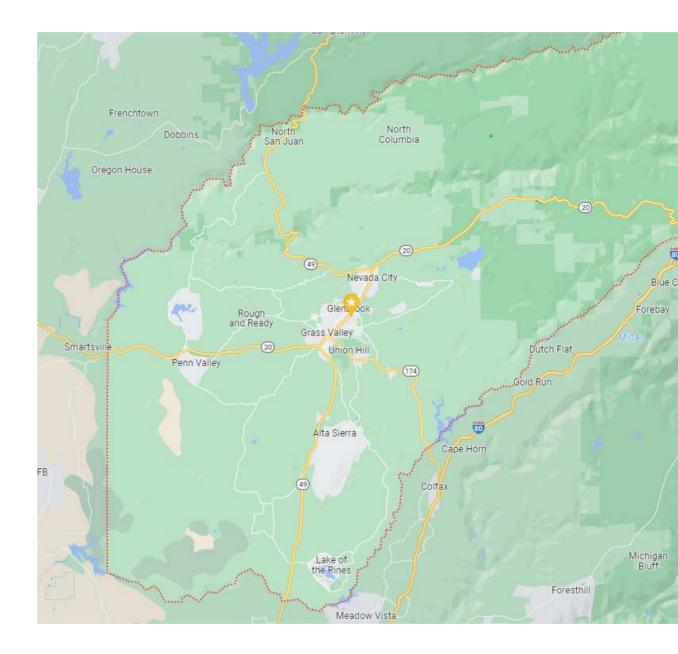

The Fee Program and Why it is being Updated

### **RTMF Program**

- Established in FY 2000/2001
- Covers western Nevada County (Grass Valley, Nevada City, and parts of unincorporated Nevada County)
- Separate from the local fee programs
- Has successfully brought in \$8.4M to help fund needed infrastructure to accommodate new growth
- Original nexus study done in 2000.
   Previous updates done in 2008 and 2016.

#### Why Update the Fees?

State law (Mitigation Fee Act) requires that impact fees be periodically reviewed and adjusted, because:

- Conditions Change Congestion levels change, growth forecasts change, construction costs change, projects are completed and paid off, etc.
- Policies and Priorities Change Programs sometimes play out differently than anticipated
- Maintain Fairness Adjustments are needed to ensure that the fees remain fair for all concerned; that development pays its fair share for needed improvements, but no more than that

# AB 602 & SB 13

**New Requirements** 

#### **AB-602**

- Intended to clean up, "... an opaque and informal patchwork of guidelines and common practices" and to reduce the fees burden on small, affordable units
- Signed by Governor in September 2021, and went into effect in 2022.
- Most of the provisions were best practices that the RTMF program had been following for years, but programs in other parts of the state might not have been
- Biggest change was that fees on residential development must now be based on the floor area of dwelling unit; not a flat fee by dwelling type

#### **New Framework for Residential Fees**

- The new framework has 3 size categories for each dwelling type
  - Small (< 1,500 sq. ft.)
  - Medium (1,501 2,500 sq. ft.)
  - Large (>2,500 sq. ft.)
- Larger units will be charged more than smaller units

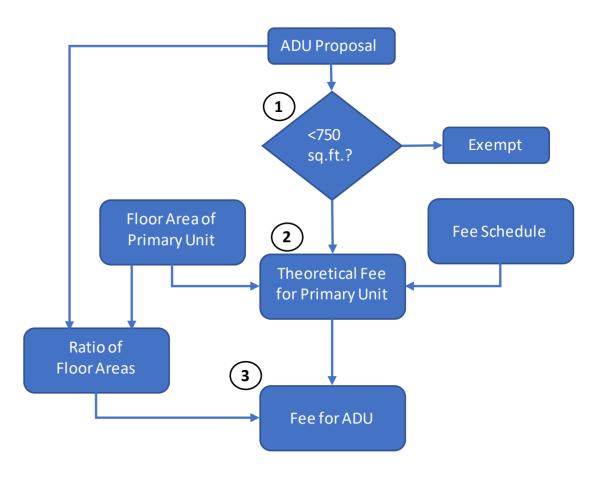

10

#### SB-13 Requirements for Accessory Dwelling Units (ADUs)

SB-13 completely changes the way that fees on ADUs are calculated. From now on:

- ADUs smaller than 750 sq.ft. are exempt from fees
- If larger than 750 sq.ft., then the fee shall be charged proportionately in relation to the square footage of the primary dwelling unit
- So an ADU that is half the size of the primary unit will now pay half the fee that the primary unit would pay (if the primary unit was newly constructed)

13 I GHD

# **Nexus Study**

**Steps in the Process** 

#### **Changes Since 2016 Nexus Study**

- The economy & housing market Recovery from Great Recession, then COVID-19, then 2<sup>nd</sup> recovery
- Demographic trends & growth forecasts California's population peaked, development slowing down
- Project status Some RTMF projects have been completed
- Trip Generation Rates Updated based on recent surveys
- Construction Prices Up about 30% since 2016

## **Identify Impacts using TDF model**

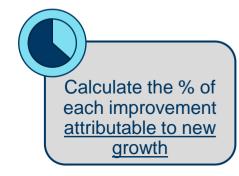

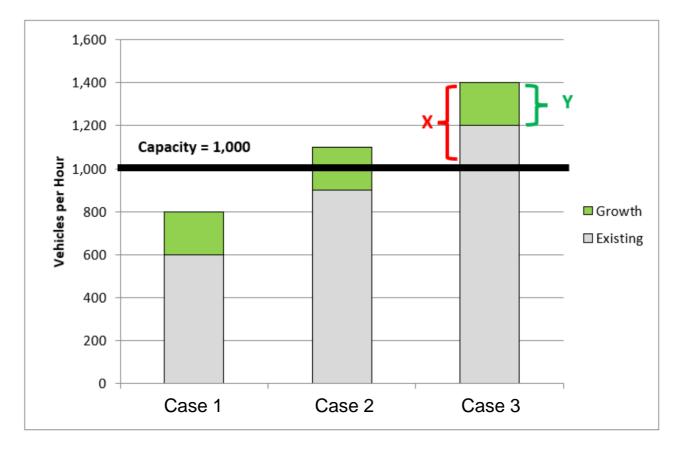

# **Identify Impacts**

Project ID (Prior 2015 Study)	Project ID (New)	Project	Status	
1	1	Dorsey Dr Interchange @ SR 20/49	Keep for Reimbursement	✓
	2	E. Main St/Bennett/Richardson	Keep for Reimbursement	凶
		SR-49 SB: South of La Barr Meadows Rd	Constructed	
	3	SR-49 SB Capital Improvement Project Phase 2 (PM 13.1 to PM 11.0)	Deficiency	<b>~</b>
2		SR-49: South of La Barr Meadows Rd (SB) SR-49: South of La Barr Meadows Rd (NB)	Most SR 49 Widening	
3		SR-49: South of Alta Sierra Dr (SB) SR-49: South of Alta Sierra Dr (NB)	Projects Removed	
4		SR-49: South of Wolf Creek		
		SR-20/49: Bennett St to Idaho-Maryland Rd	No deficiency	
		McKnight Way/Taylorville Rd

8		SR 20/49 & Ridge Rd/Gold Flat Rd Interchange	No deficiency	
9	7	SR 20/SR 49/Uren St	Deficiency	<b>Y</b>
		Brunswick Rd/E Bennett St/Greenhorn Rd	No deficiency	
	8	Brunswick Rd/SR 174/Colfax Highway	Deficiency	<b>Y</b>
		SR-49/Cement Hill Rd	No deficiency	
10	9	SR-49/Coyote St	Deficiency	<b>Y</b>

### **Calculating % Attributable to New Development**

Case 1 = No deficiency, even with new development. No fee can be charged

Case 2 = New development causes a deficiency. 100% attributable to new development

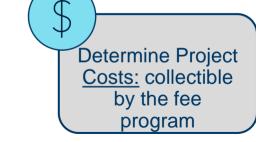

Case 3 = Existing deficiency. New Development's Share of the future deficiency is Y/X

#### Calculating the Amounts Potential Collectable

The application to take to see the trace of		As a percent of total costs for needed projects				54%	63%	7%	28%	

- SR 49 Projects removed due to cost
- State law would allow NCTC to charge new development up to 54% of project costs
- However, grant funding allows this to be reduced to 28%

#### Residential vs. Non-Residential Traffic Growth

Trip Purpose	Growth in VMT	% of Total VMT Growth
Attributable to Residential Development		
Home-Base Other Trips	122,759	36%
Home-Base Work Trips	169,544	49%
Home-Based School Trips	2,068	1%
Home-Based Sierra College Trips	1,427	0%
Attributable to Non-Residential Development		
Non-Home-Based Trips	47,670	14%
Total	343,467	100%

86% of the growth in traffic is expected to come from residential development

- Many residents of western Nevada County out-commute to work and shop, putting a strain on the main regional roads
- Non-residential development that lets people work and shop locally is relatively easy on the road system

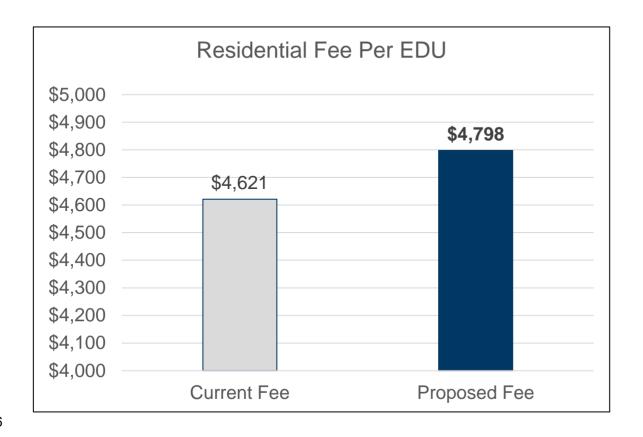

# Draft Results and Proposed Changes in Fees

#### **Recommended Fees**

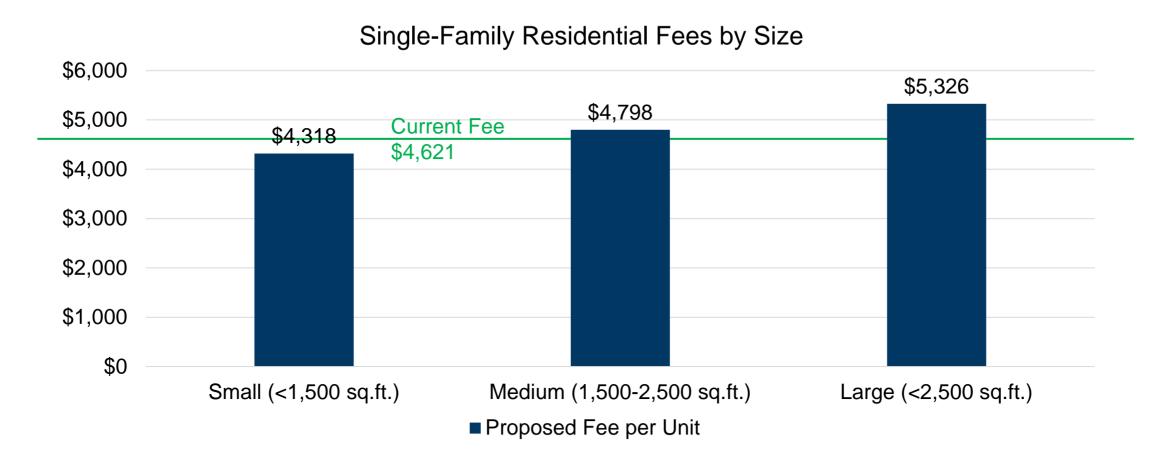

Trip Type	Current Fee	Proposed Fee	% Change
Residential Fee Per EDU	\$4,621.01	\$4,797.90	3.8%
Non-Residential Fee per Trips	\$85.72	\$59.19	-31%
